

Best Ever Coconut Oil Deoderant

Ingredients:

1. 1/4 cup arrowroot powder
2. 1/4 cup baking soda
3. 4 tablespoonfuls of organic virgin coconut oil
4. 10-15 drops of lavender essential oil

Heat the coconut oil just enough for it to melt.

Once liquefied, stir in the arrowroot powder and the baking soda until they are dissolved. Add the lavender drops according to your scent preference (you may use another oil if preferred). Pour into the container of your choice and let stand until room temperature. The coconut oil will solidify leaving you with a great cream deoderant!
